EXPERIENCE

The Loop, Remote: *Frontend Engineer — React/Typescript (Contract)*

DECEMBER 2022 - PRESENT

I work regularly with transportation, weather and geo-information APIs, using JSON and Protocol Buffers, to develop applications for smart a city.

I migrated an in-house custom UI components Storybook monorepo from Javascript to Typescript, using Lerna and Vite.

ColorElephant, Remote: *Frontend Engineer — React (Contract)*

SEPTEMBER 2021 - DECEMBER 2022

I developed frontend web applications, working in teams to build a membership based fitness application, a project management application and a navigation web application, working with OpenStreetMap.

Matious Digital, Remote: *React/Frontend Developer(Contract/Freelance)*

FEBRUARY 2021 - SEPTEMBER 2021

I developed frontend web applications, such as real estate web apps, Enterprise Resource Planner (internal tool), and an online seminar application using React. I currently work with this client

Coma Web Development, Remote: *Frontend Developer(Contract/Freelance)*

SEPTEMBER 2020 - JANUARY 2021

I built the frontend of a website for a company in the hospitality industry using HTML, CSS, and JavaScript.
